

### Clear Lake Water Levels for 1977, 2014, & 2021 and multiple predicted\* 2021 levels

\*Predicted values derived from a simplified Penman Formula for evaporation rate. The model considers altitude, dew point temperatures, and daily mean temperatures and other values based on several locations around Clear Lake. The model was not validated against other models and calculated predictions use gage data starting from April 1, 2021. Adjusted predictions incorporate the variables from their respective years (i.e. 1977 & 2014).
